How to Register a New Account

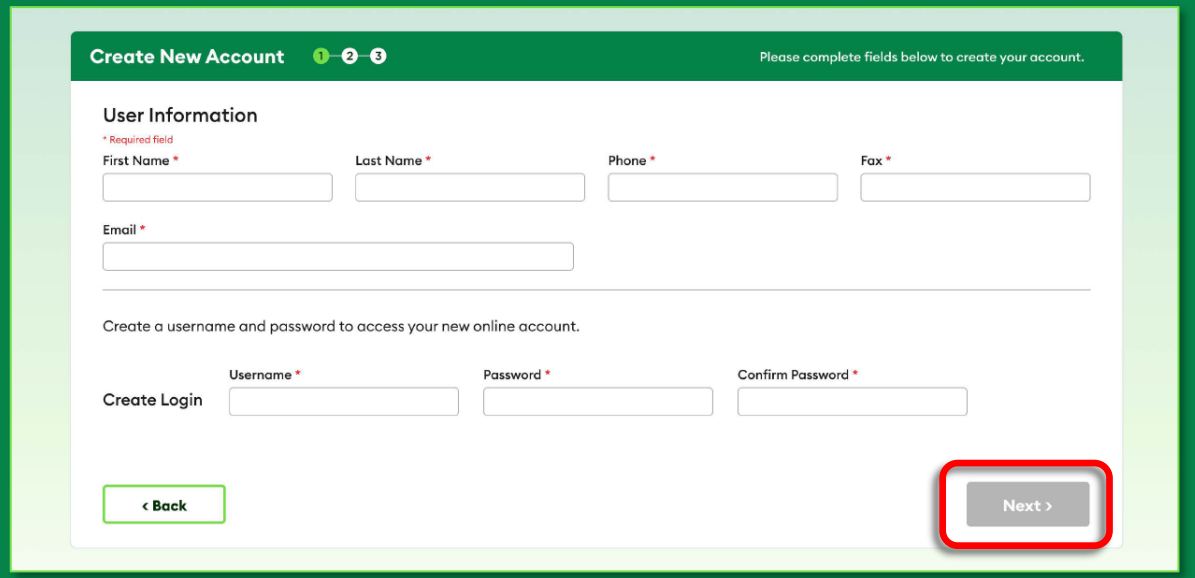

New users can begin the registration process by selecting the ‘Create Account’ button.

Account registration is a 3-step process monitored by a ‘progress tracker’ at the top of the user’s screen.

Step 1 will prompt the user to complete all required fields on the ‘Create New Account – User Information’ page.

After completion, the user will select ‘Next’ to proceed to step 2.

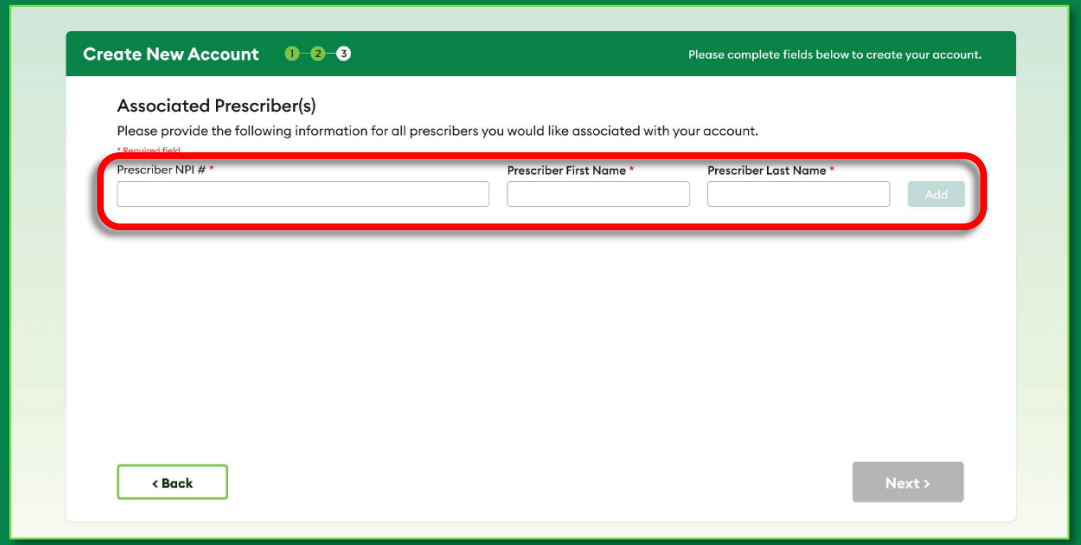

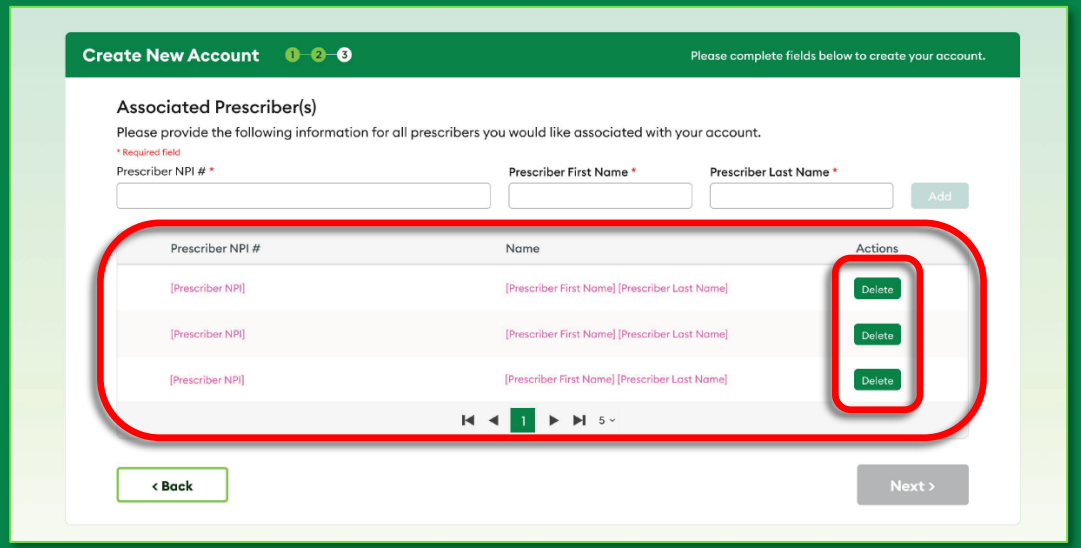

How to Register a New Account

Step 2, ‘Associated Prescriber(s)’, will prompt the user to enter one or more prescriber(s) they would like to have associated with their account.

Users will enter the prescriber's NPI, first name, and last name to verify the prescriber against the national database.

All added prescribers will be displayed in a table for the user to reference. The user can remove any unnecessary entries by utilizing the ‘delete’ button.

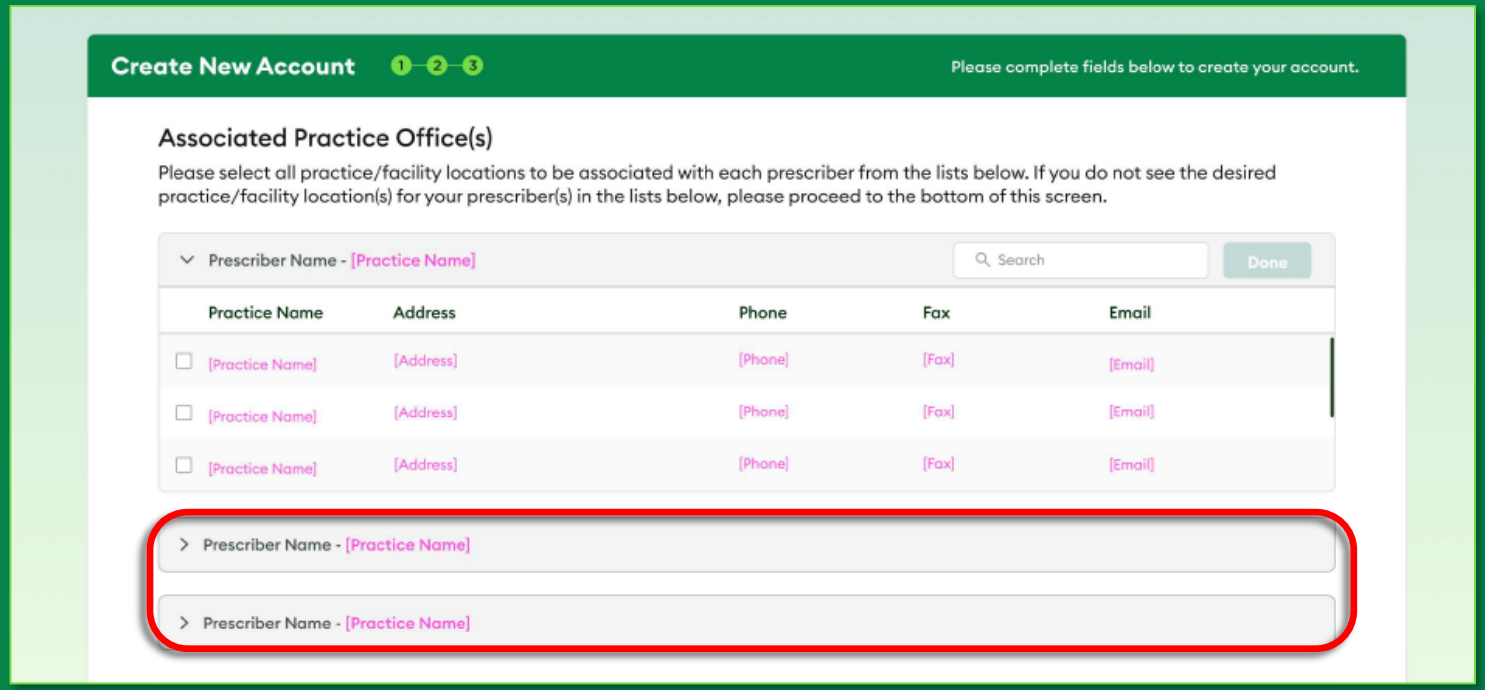

How to Register a New Account

Step 3, ‘Associated Practice Office(s)’, will prompt the user to select one or more practice/facility locations they would like to have associated with their account.

If a prescriber entered in step 2 has already enrolled through the program, their previously associated practice/facility locations will display under their name for the user to select from.

If the desired practice/facility location does not appear under the prescriber’s name, the user can complete the required information to add the location to the available options.

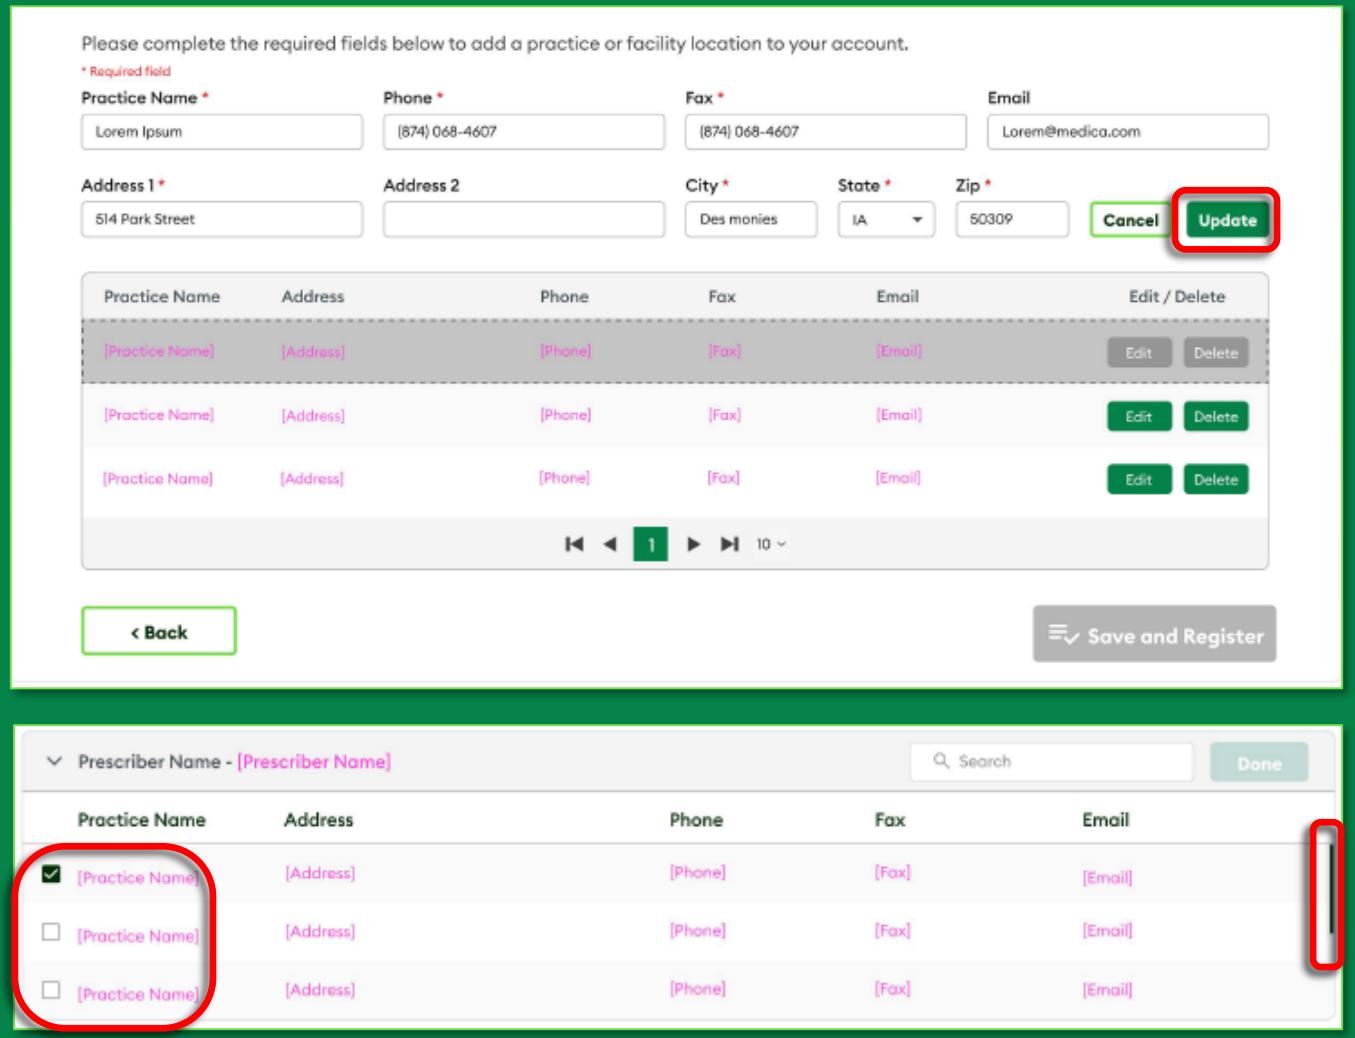

How to Register a New Account

After completing the required information, the user can ‘Update’ the new practice/facility location. Each location will populate in the ‘Practice Name’ table at the bottom of the screen.

The user can ‘Edit’ or ‘Delete’ location entries on this table by selecting the corresponding buttons.

After the desired practice/facility locations have been entered, the user will return to the top of the screen to indicate which prescribers should be associated to the newly added locations by selecting the check box.

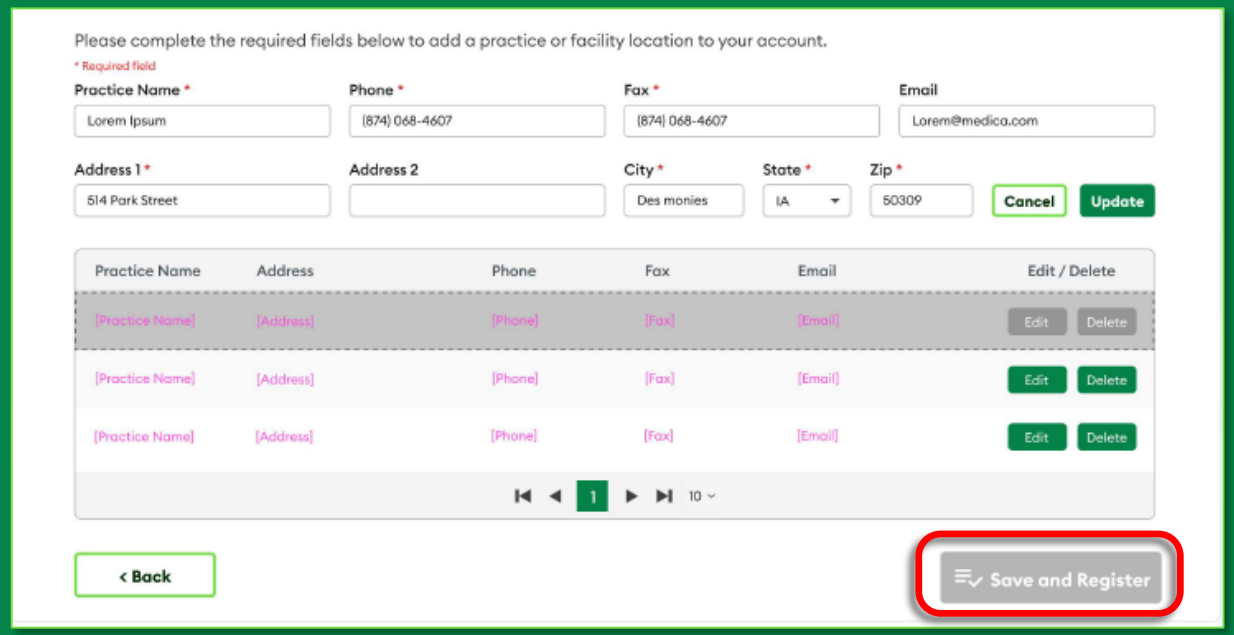

How to Register a New Account

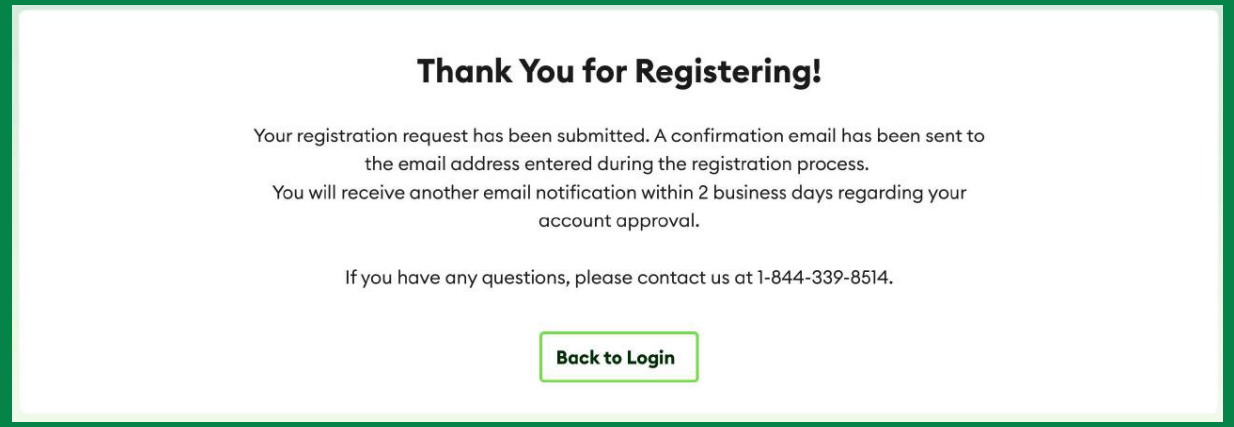

Users may edit/delete associated practice office(s) or prescriber information at any time after successful registration.

Once the user selects the ‘Save and Register’ button at the end of step 3, the user registration process will be complete.

The following confirmation message outlines the steps the Lantheus Link team will perform to validate the user’s identity and ensure patient health information is kept secure.

As practice offices are verified, the user will be able to see patient information associated with the approved offices.

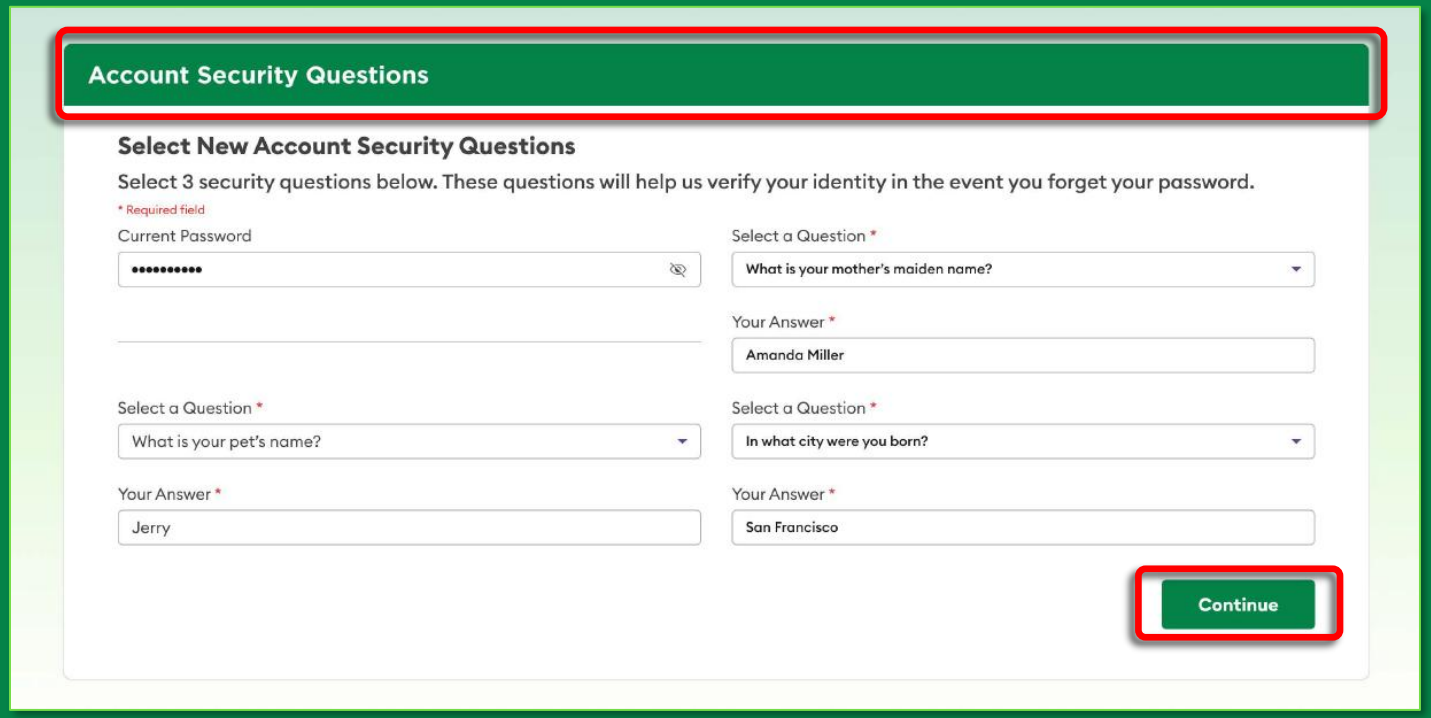

Creating Security Questions

New users will be prompted to confirm their ‘Account Security Questions’ after their first successful login.

This will be the first screen the user will see after their first successful login.

These questions are required to enable users to obtain forgotten usernames or to reset their password independent of Lantheus Link program support.

After selecting ‘Continue’, the suer will be directed to the provider portal ‘Dashboard’ screen.

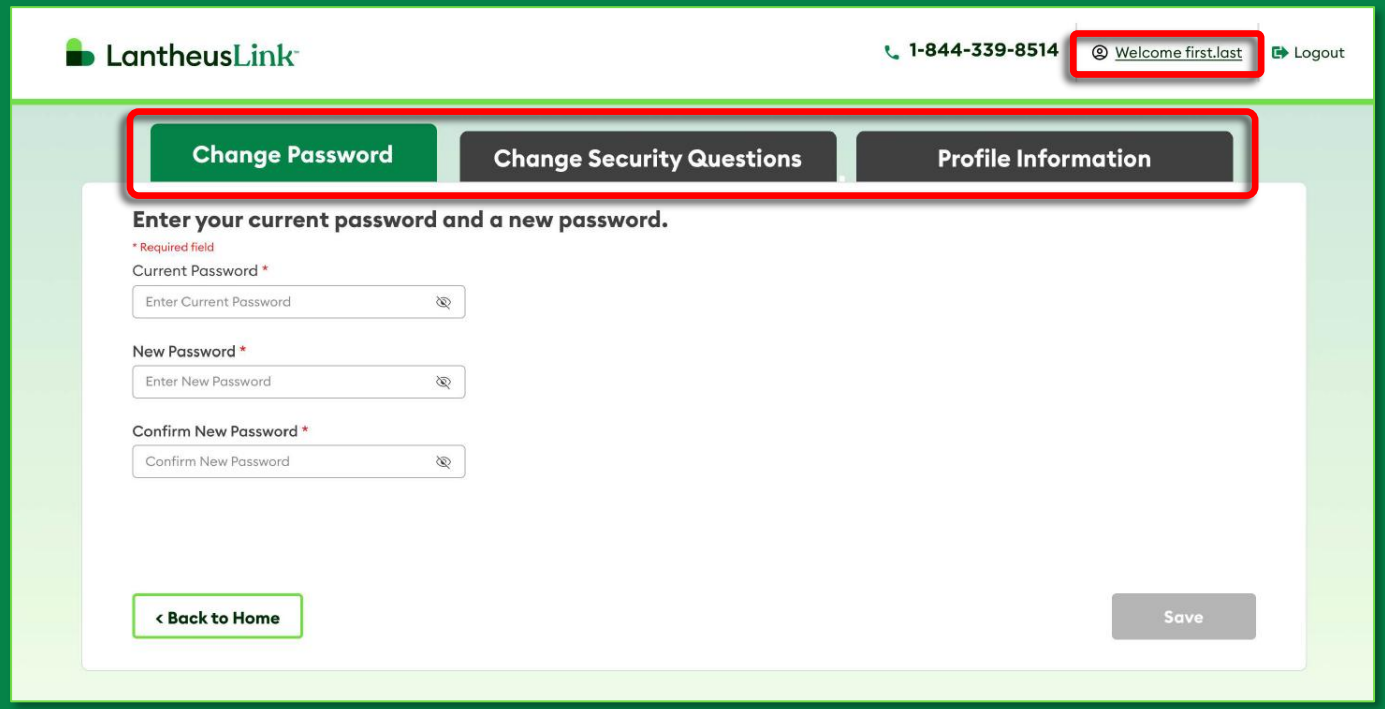

Updating Security Information

In subsequent logins, the user can update their security information at any time by selecting the 'Welcome Username' link located in the upper right-hand corner of every screen.

Users can update the following information at any time:

- Password
- Security Questions
- Profile Information

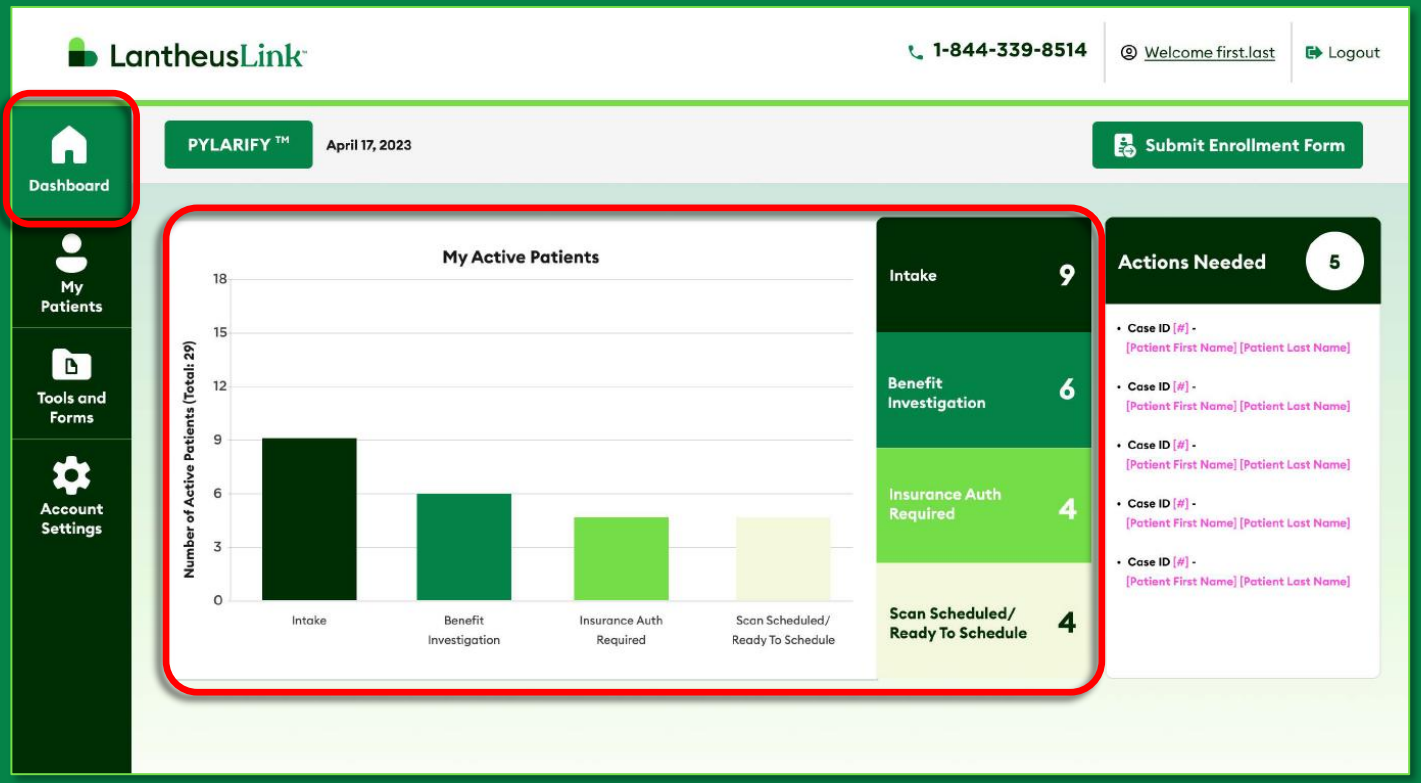

Utilizing the Dashboard

The ‘Dashboard’ is the first tile of the navigation panel, located on the left-hand side of the user’s screen.

The ‘Dashboard’ displays an overview of active patient information. Active patients are sorted into 6 status categories:

- Intake
- Benefit Investigation in Process
- Insurance Auth Required
- Scan Scheduled or Ready to Schedule

The user can select one of the status categories and be directed to the ‘My Patients’ page with that status filter automatically applied.

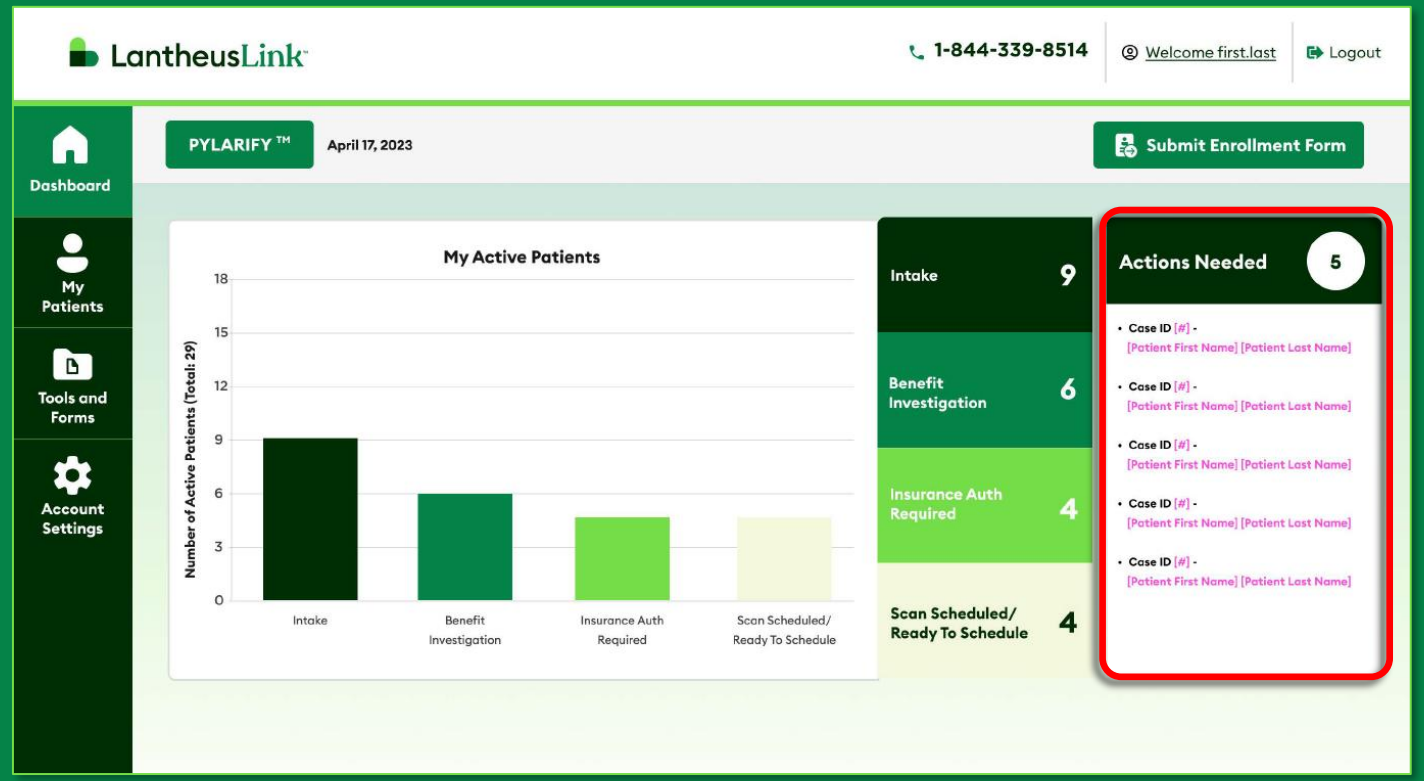

Utilizing the Dashboard

The ‘Dashboard’ also displays a list of patient cases that require action from the provider.

The ‘Actions Needed’ table will show the total number of patient cases, associated with the user’s account, that require action. Under the total, the patient ‘Case ID’ and name will be displayed.

By selecting the patient ‘Case ID’/name, the user will be directed to the ‘Patient Details’ page for that patient, where they can review the actions required for the enrollment to proceed.

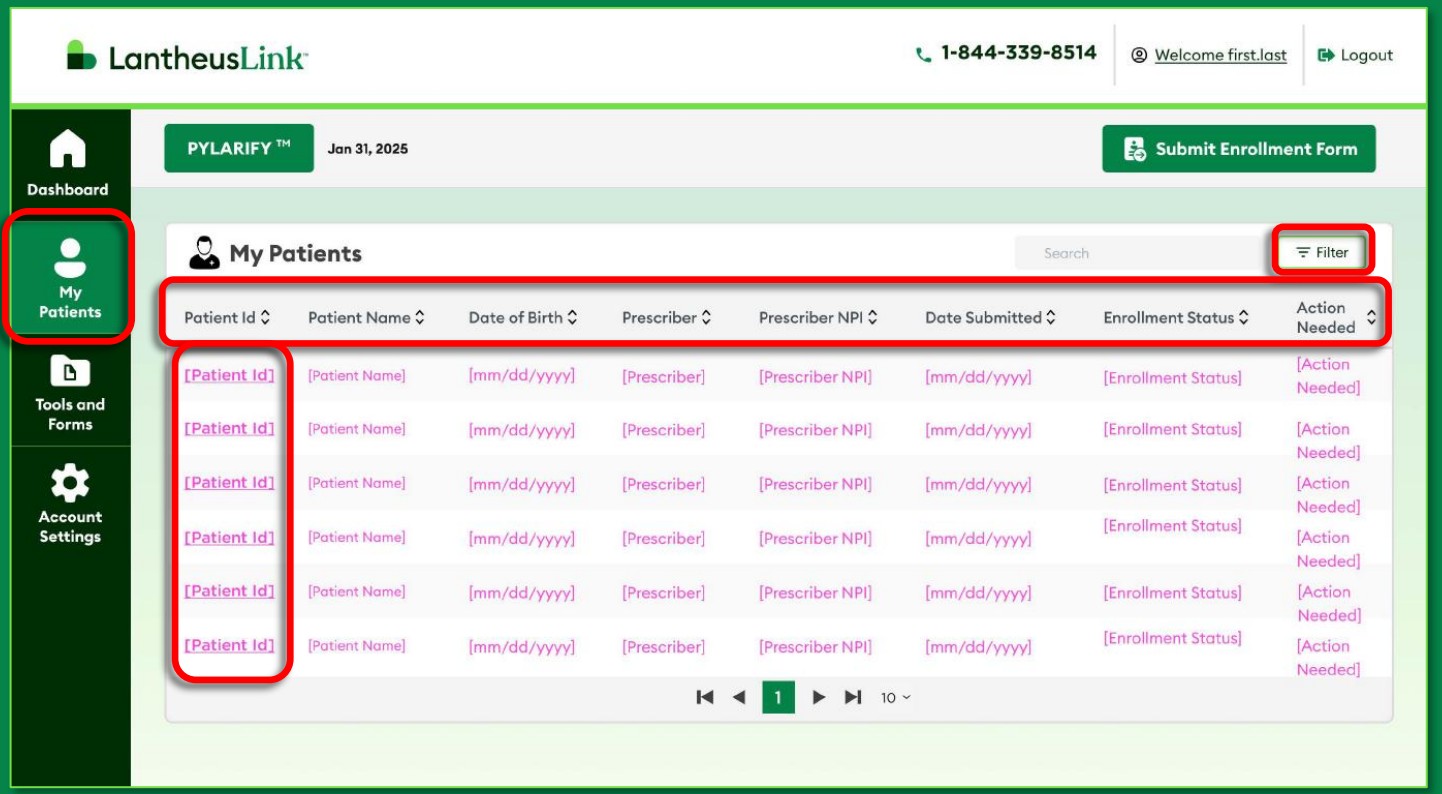

Accessing My Patients

The ‘My Patients’ tab on the navigation panel will take the user to a screen where they can view aggregated patient profile information.

This aggregated list displays all patients from the verified practice office(s) associated with the user’s account.

Users can select the ‘Filter’ button to drill-down results or utilize the ‘Search’ bar to find a specific value in the table.

By selecting a patient’s ‘Patient ID’ number, users will be directed to that patient’s information page.

Accessing My Patients

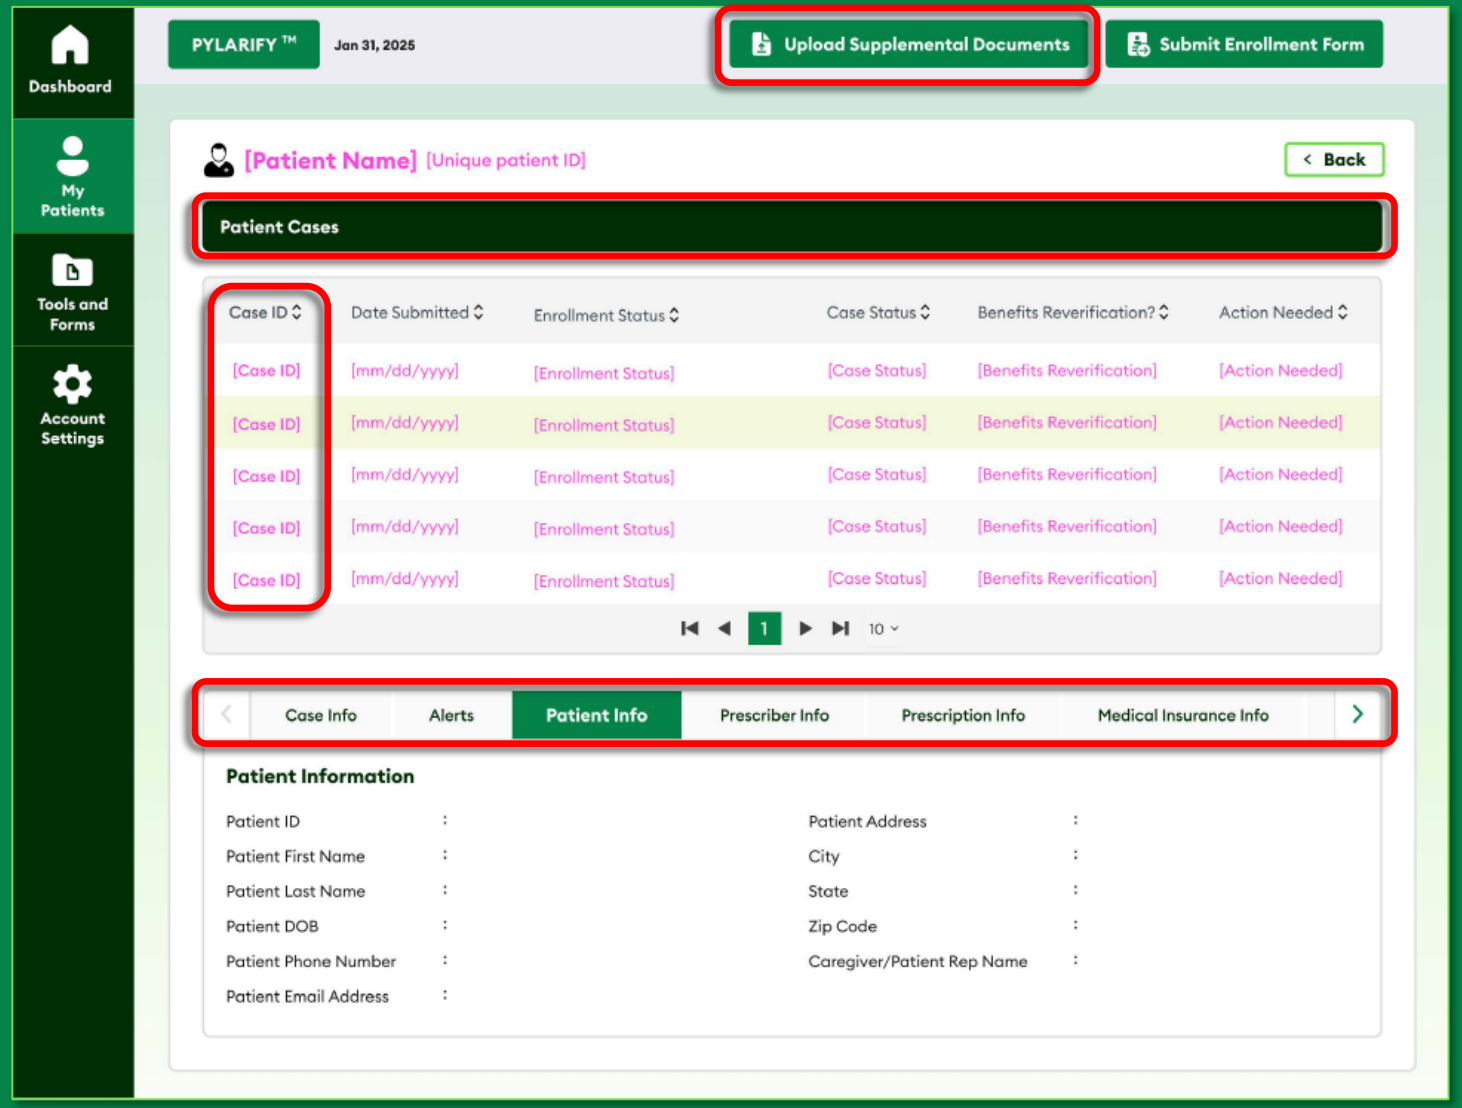

The patient details page displays all cases associated with the individual patient selected.

To view patient details, the user will select a ‘Case ID’ from the ‘Patient Cases’ table.

Users can peruse the selected patient case’s information using the scroll bar:

- Additional patient and case details, including insurance and coverage information
- Patient-specific action items via the ‘Alerts’ tab
- View case documents via the ‘Documents’ tab

The user will have the option to upload PDF documents to individual patient cases by selecting the ‘Upload Supplemental Documents’ button at the top of the screen

Completing an Enrollment Form

Users can select the ‘Submit Enrollment Form’ button to start the process of completing and submitting an enrollment form to the Lantheus Link program through the provider portal.

The ‘Submit Enrollment Form’ button can be accessed from the ‘Dashboard’, ‘My Patients’, and ‘Tools and Forms’ navigation tiles.

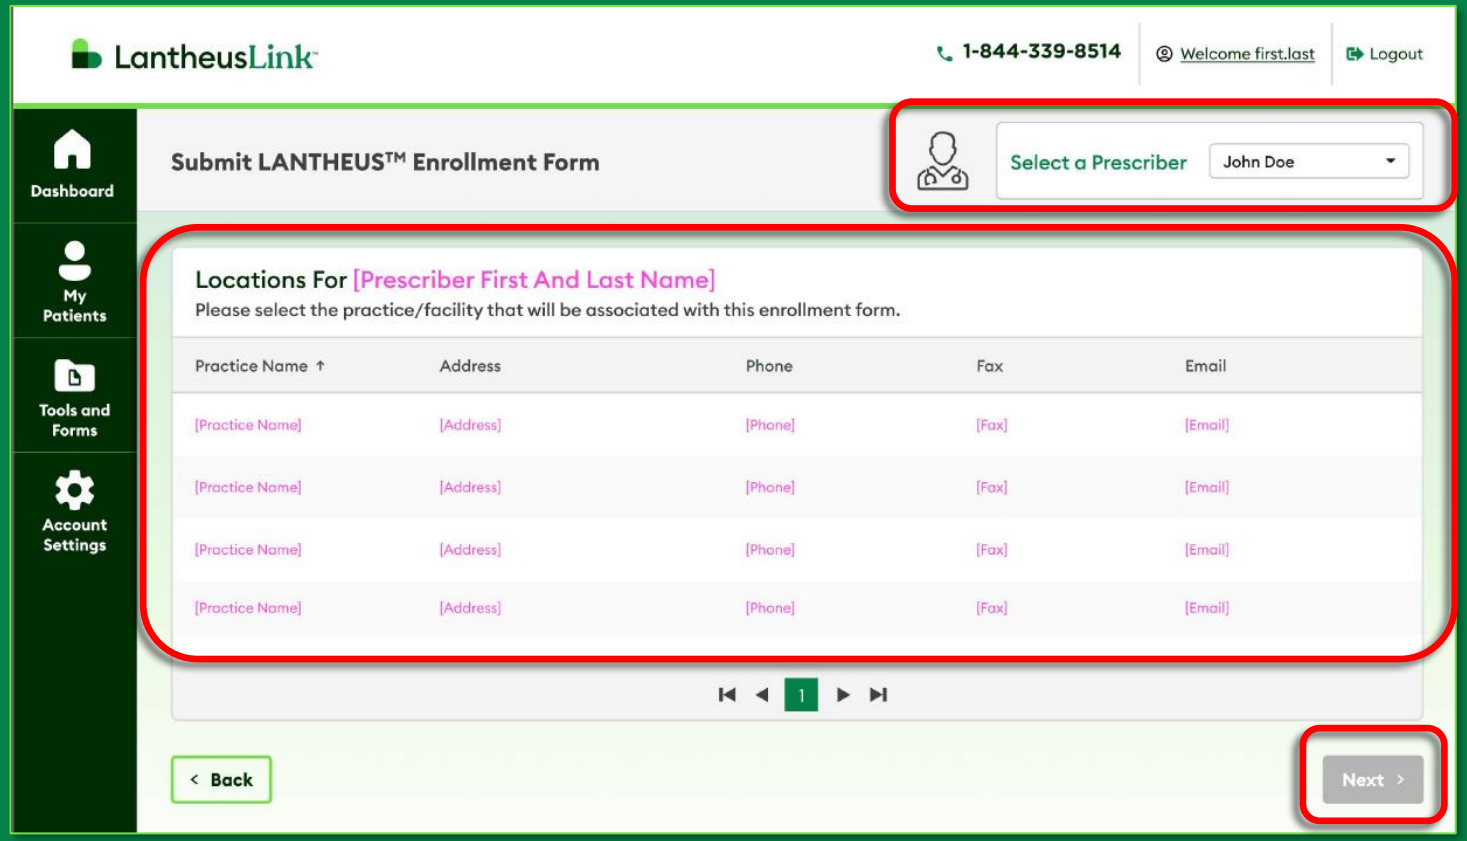

Completing an Enrollment Form

Users will begin by choosing the patient's provider along with the practice location and selecting the 'Next' button.

Users will then complete steps 1-5 of the enrollment process*. This includes:

- Services Requested
- Patient Information
- Prescriber Information
- Insurance Information
- Clinical Information

**Users will be unable to advance to the next step if required information is not provided.*

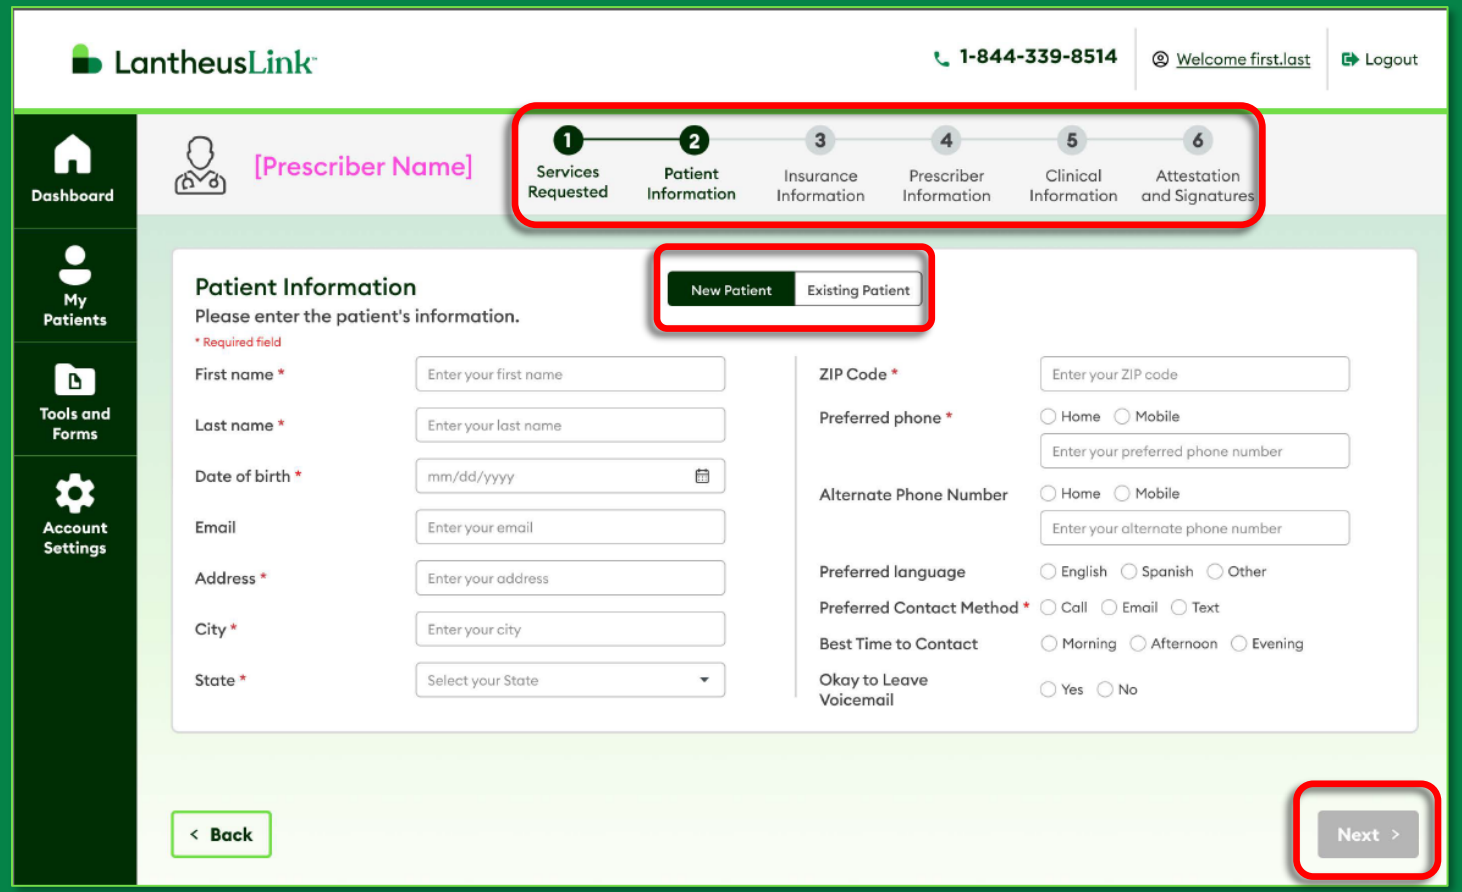

Completing an Enrollment Form

The enrollment process through the provider portal mirrors the Lantheus Link program enrollment form in regard to information entry and required fields.

Users will be unable to advance to the next step if the required fields are not completed, as indicated with a red asterisk.

Prescriber information will pre-populate based on the selections made during the enrollment initiation in 'Step 4'. If a user is reenrolling a patient, they will be able to pre-populate patient information as well.

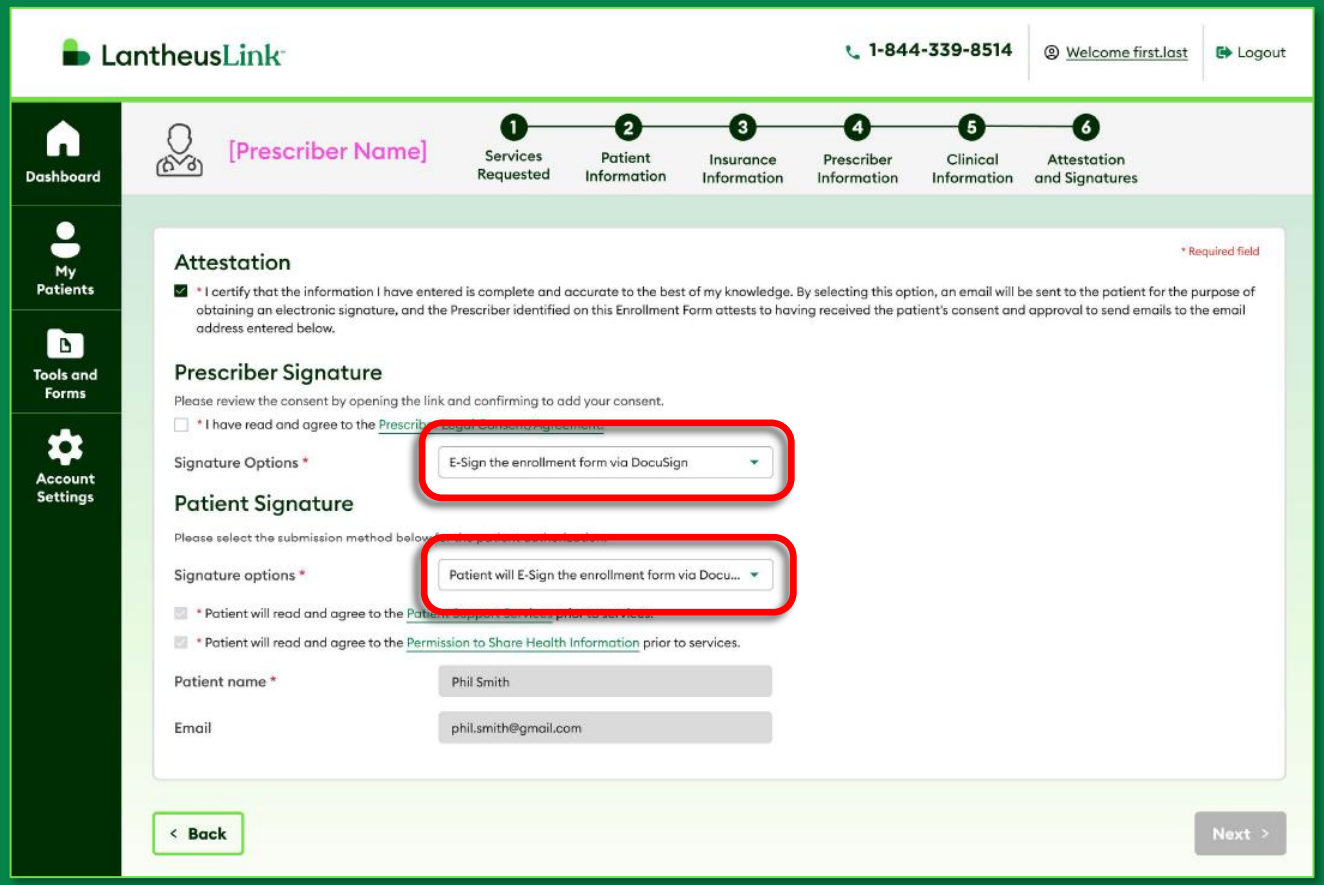

Completing an Enrollment Form

Step 6 will prompt the user to indicate how they would like to sign the completed enrollment form.

The user can select the ‘E-sign the enrollment form via DocuSign’ option to initiate the DocuSign process within the portal, or they can ‘Download to print and sign’*.

The user will also indicate how the patient or authorized representative will sign, electronically through DocuSign via an email prompt, or verbally/physically in the future.

**If ‘Download to Print and Sign’ is selected, the user will not be prompted to select the patient’s method of signature.*

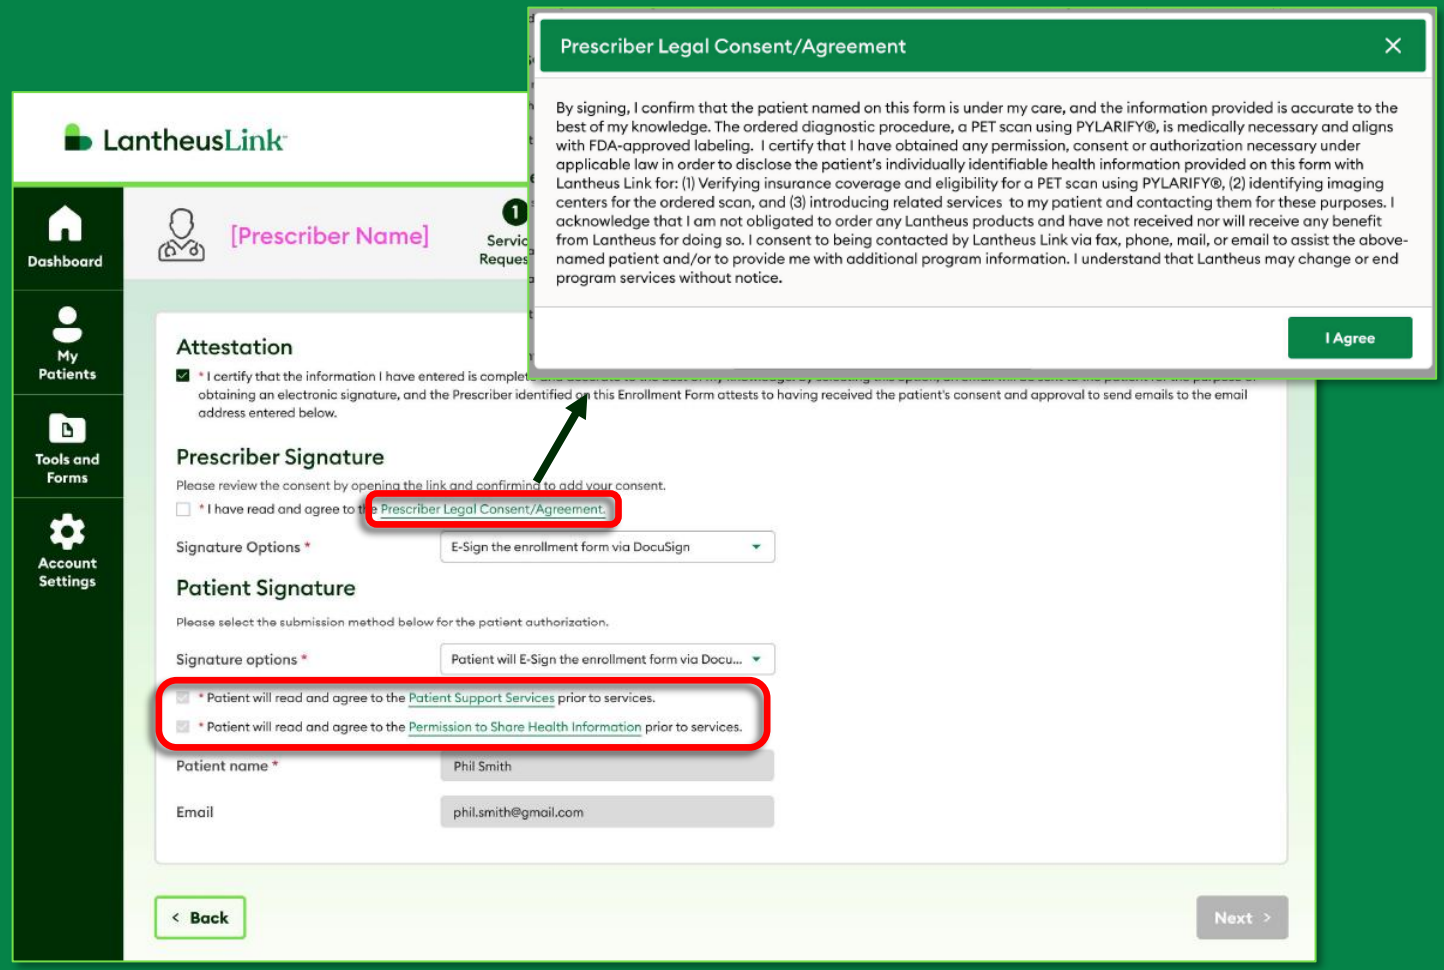

Completing an Enrollment Form

To indicate the consent opt-ins, the user must select the hyperlink for each consent type. The user must review the authorization language and then select ‘Ok’ for the consent option to be ‘checked’.

The Attestation and Prescriber consents are mandatory, but the Patient consents will automatically be selected for the Patient to review at the time of their signature.

After all required fields are completed, the user will select ‘Next’ to complete the online patient enrollment process.

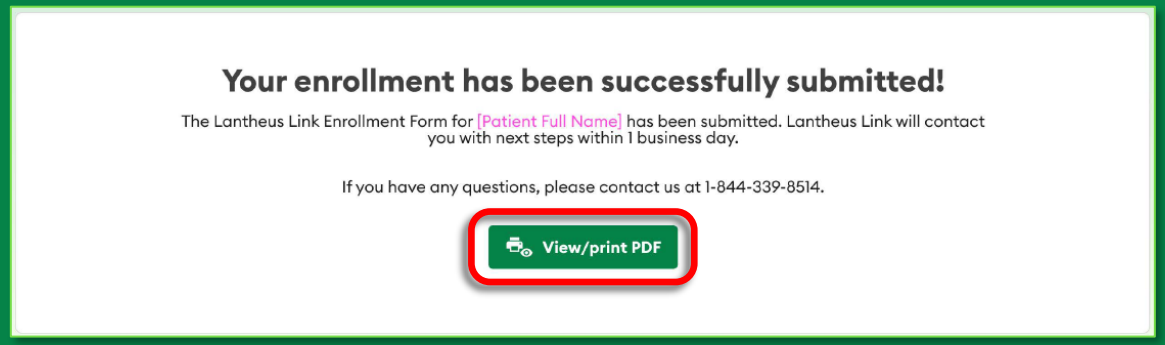

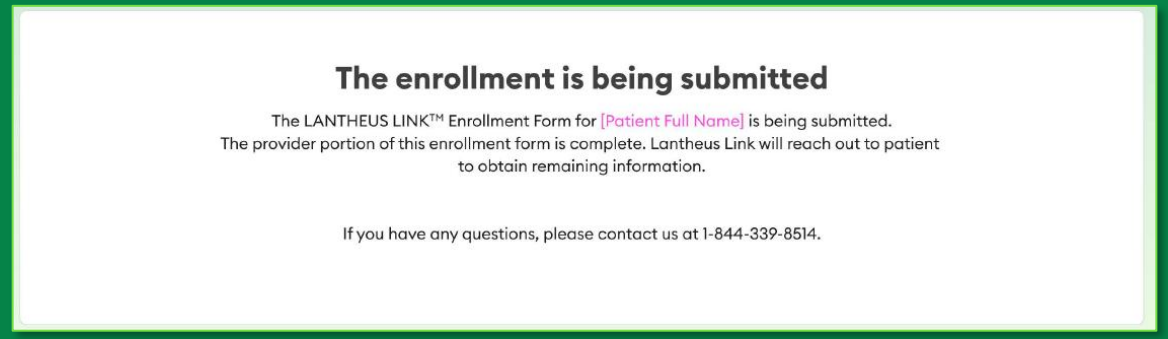

Completing an Enrollment Form

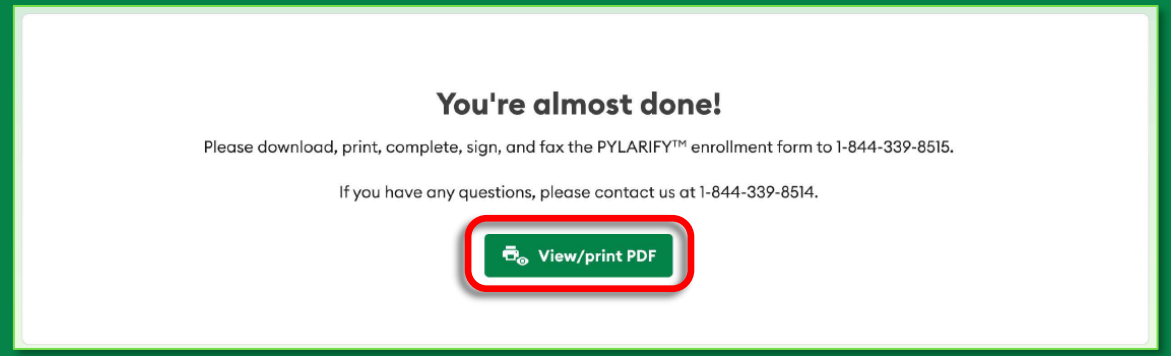

After completing all 6 steps of the online patient enrollment process successfully, the user will receive one of three submission messages, based on prescriber signature method selected in step 6.

If the user selected “Lantheus Link to reach out to Patient for required signature” in step 6, the user will be unable to view and print the completed enrollment form.

Otherwise, the user will be able to view and print the completed enrolment form. If the user opted to electronically sign, the completed PDF will include their DocuSign signature.

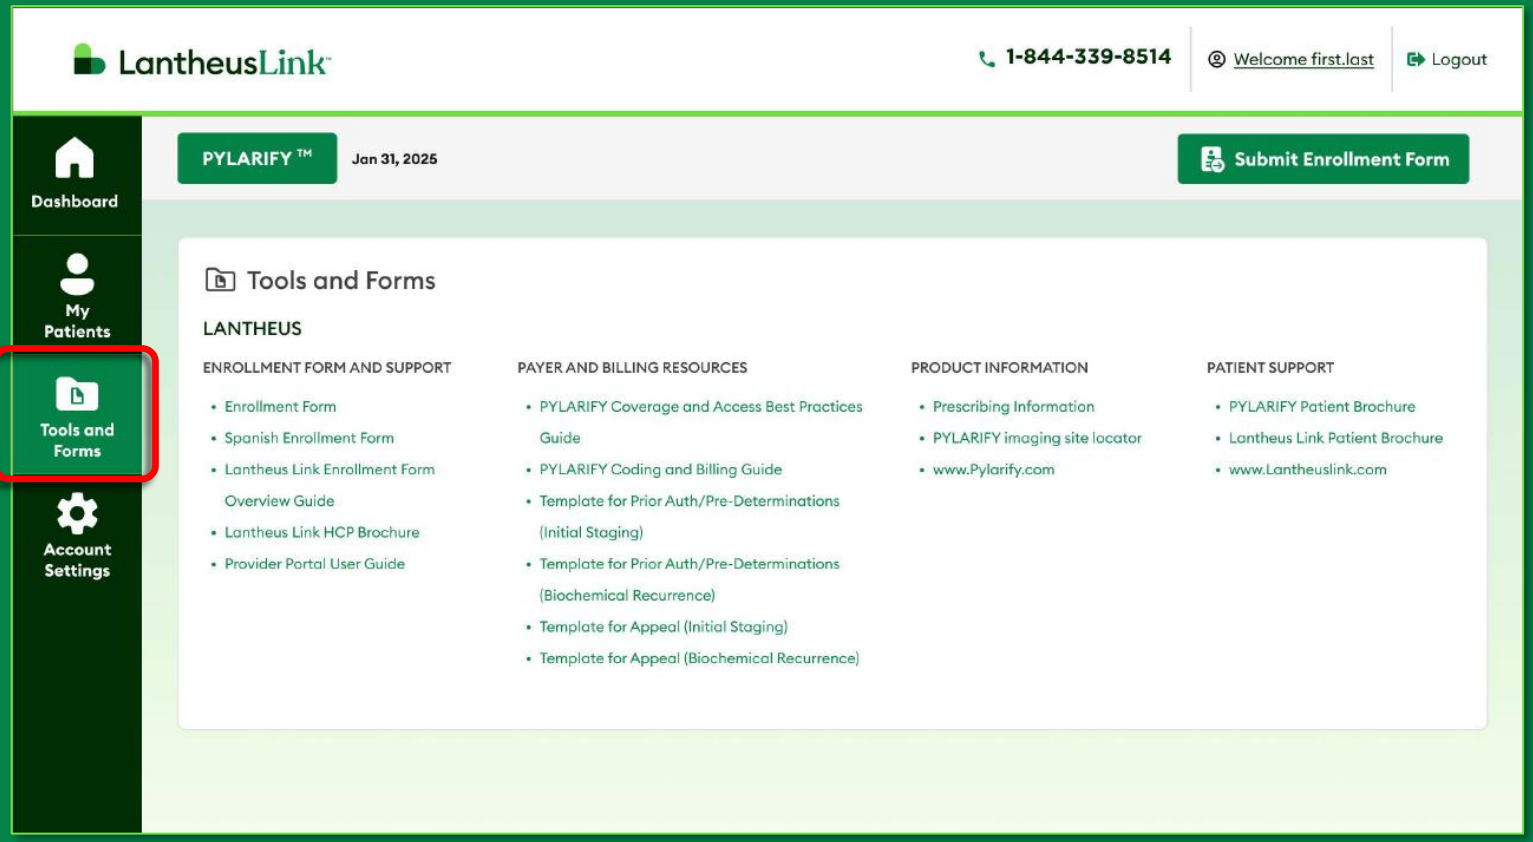

Tools and Forms

By selecting the 'Tools and Forms' tile from the navigation panel, the user can review additional resources and information available to them.

Each of the links on this page will direct the user to the associated URL in a new tab of their browser or will open the linked PDF for the user to view.

Resources include:
- Program enrollment/request forms
- Insurance authorization samples
- Billing and Coding guide
- Imaging site locator
- And more!

Updating Practice Information

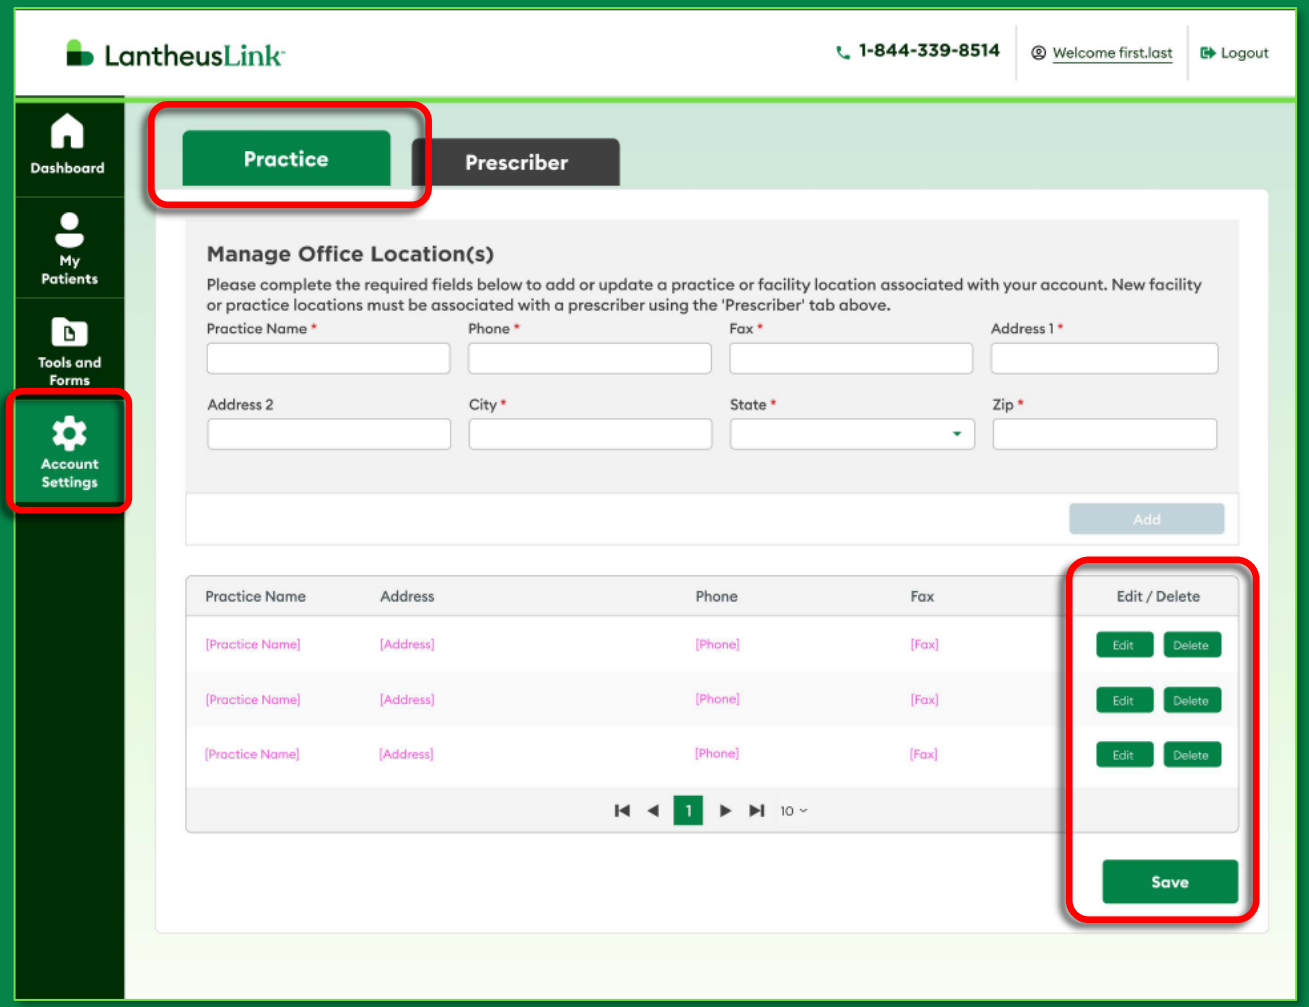

The ‘Account Settings’ tab in the left-hand navigation panel enables the user to update practice and prescriber information.

Users can update and add practice office information by selecting the ‘Practice’ tab.

From here, the user may add*, edit**, and delete practice offices by selecting the corresponding buttons.

**New practices added on this screen must be linked to a prescriber using the ‘Prescriber’ tab*

***Edits made to practice offices must be approved by the Lantheus Link program before reflecting in the user’s account*

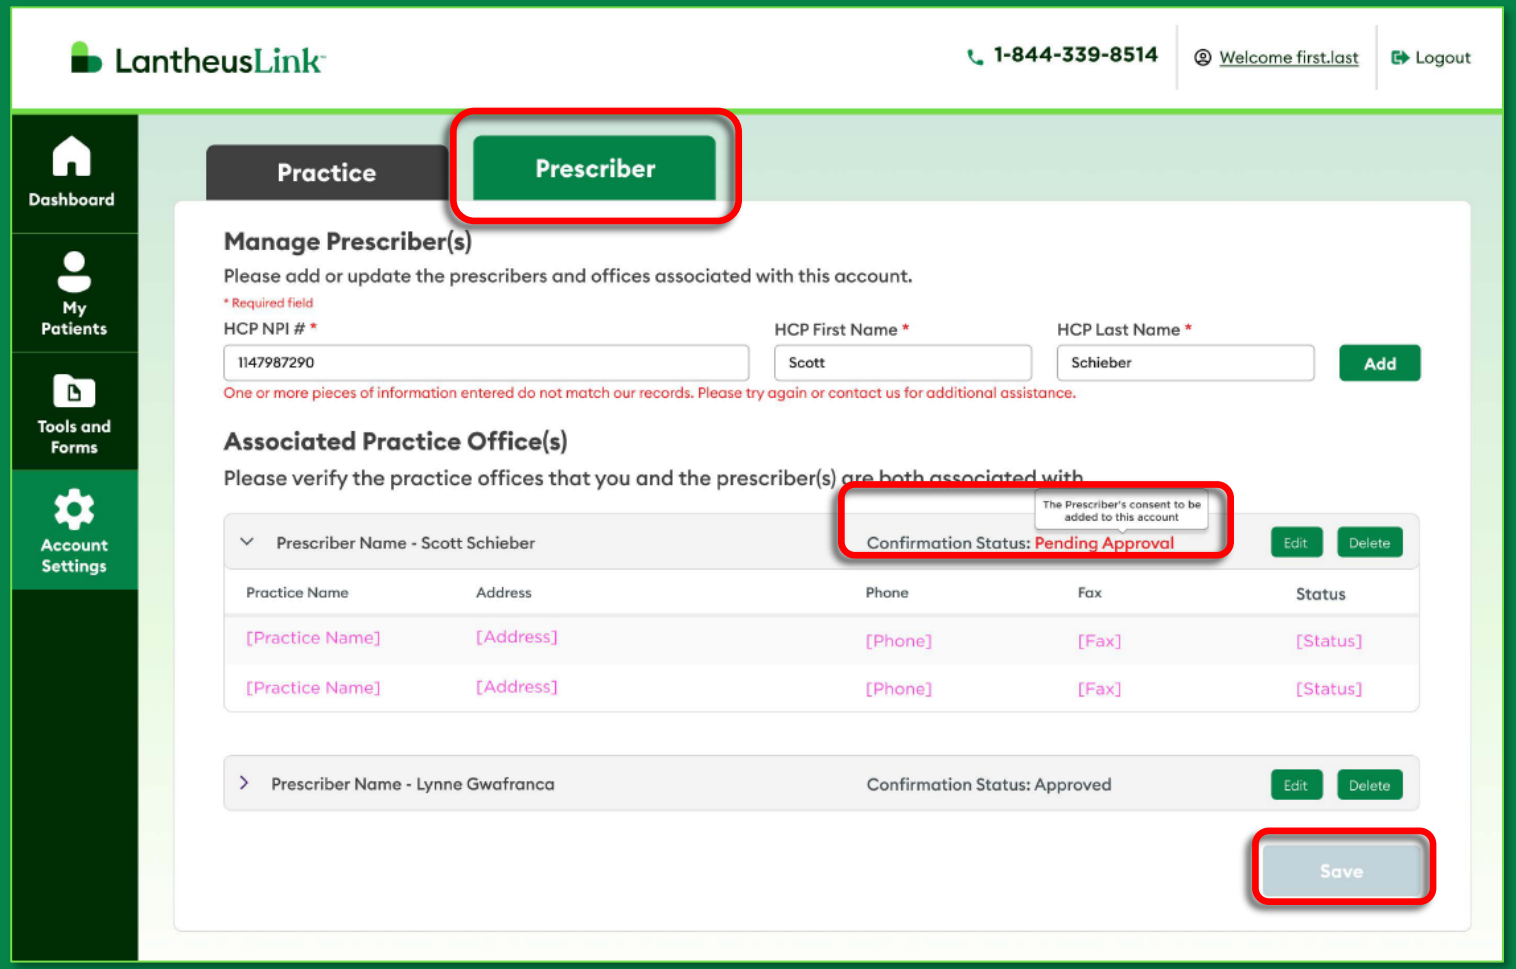

Updating Prescriber Information

Users can add, delete, or update the prescribers currently associated with their account by selecting the ‘Prescriber’ tab.

The user can associate a new practice office with an existing prescriber by selecting the ‘Edit’ button.

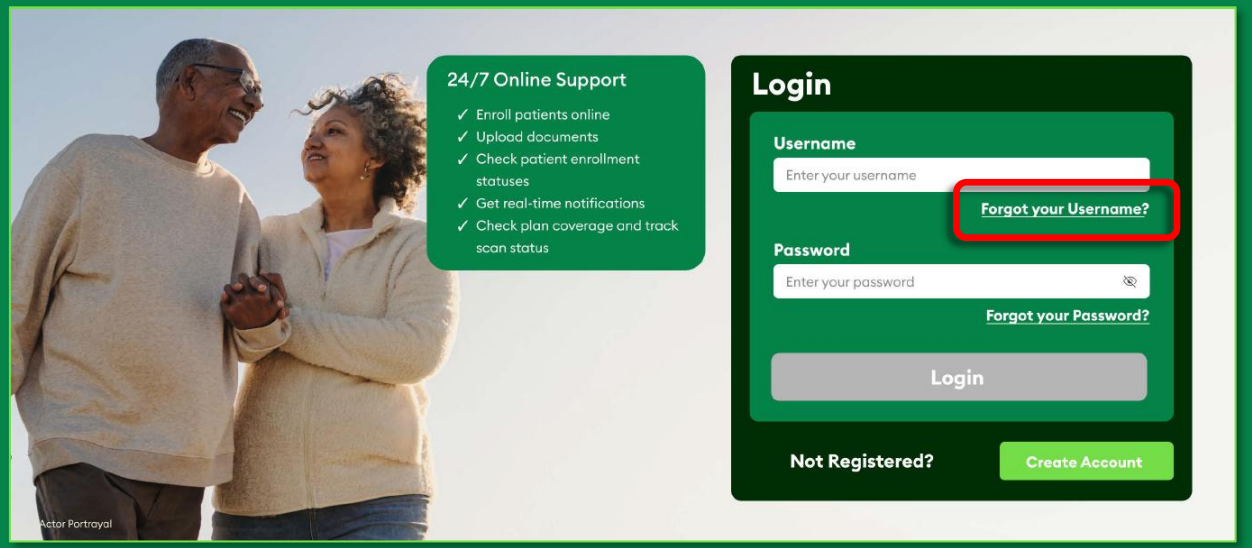

Users will also be able to view the confirmation status of each of the prescribers associated with their account. Patient information will only display for ‘Approved’ practice offices.

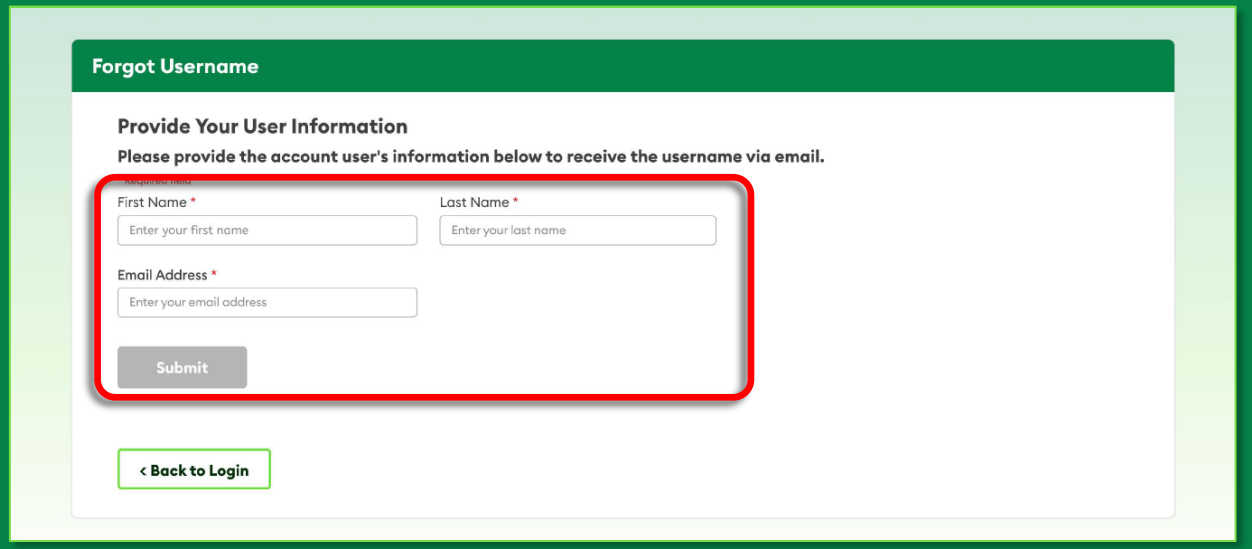

Forgotten Username

If a user forgets their username, they can obtain it by selecting the ‘Forgot Username?’ button on the login screen.

The user will enter all required information and select the ‘Submit’ button. The username will be sent to the email address associated with the user’s account.

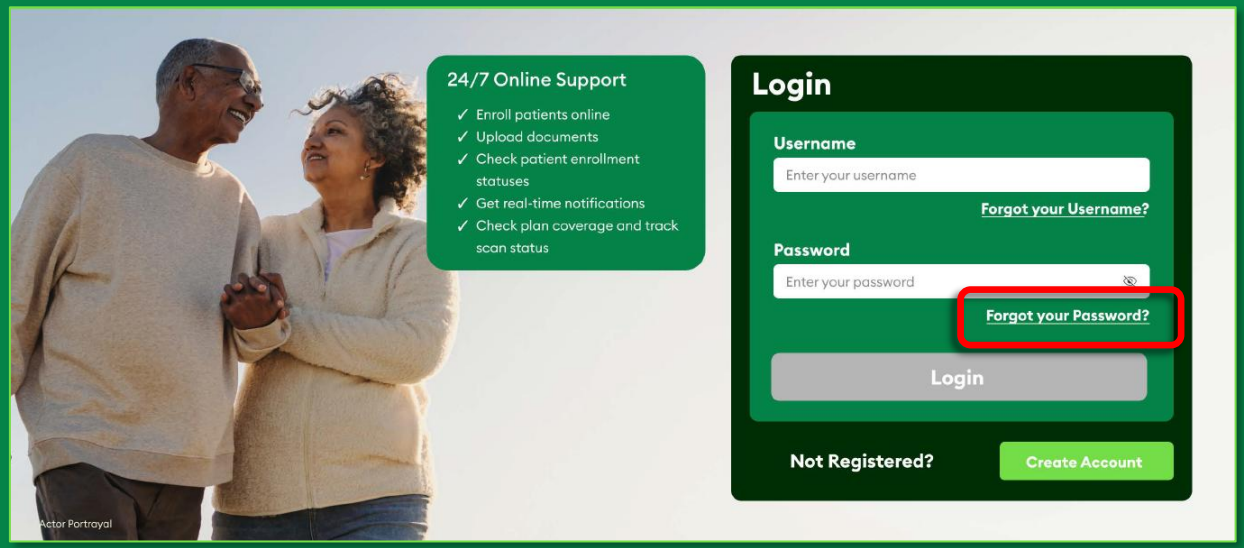

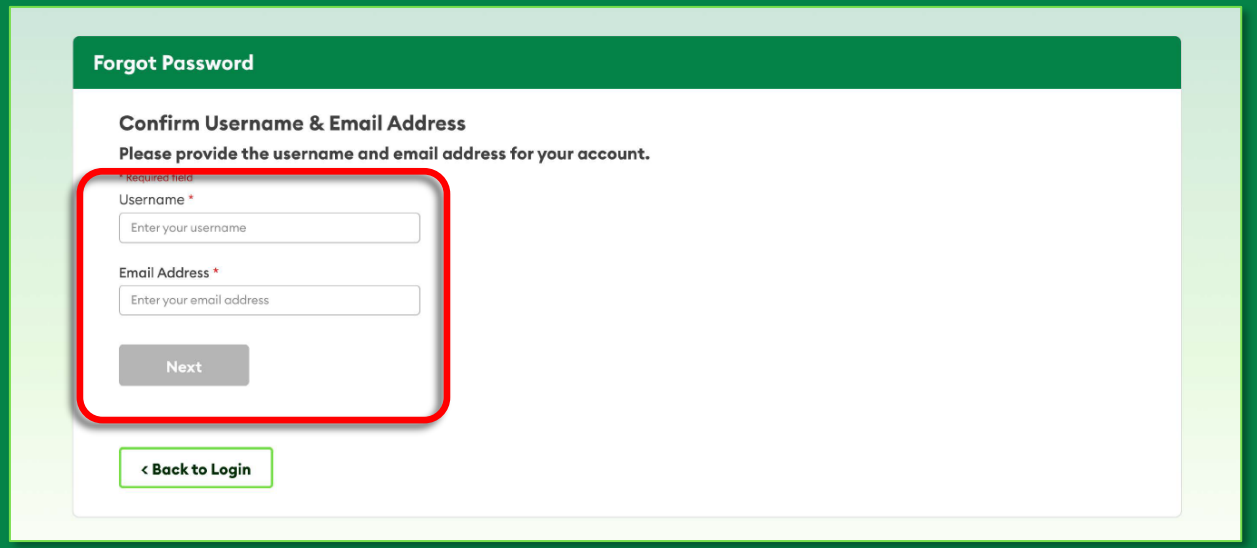

Forgotten Password Reset

If a user forgets their password, they can reset it by selecting the ‘Forgot Password?’ button on the login screen.

The user will enter the required account information and then select the ‘Next’ button.

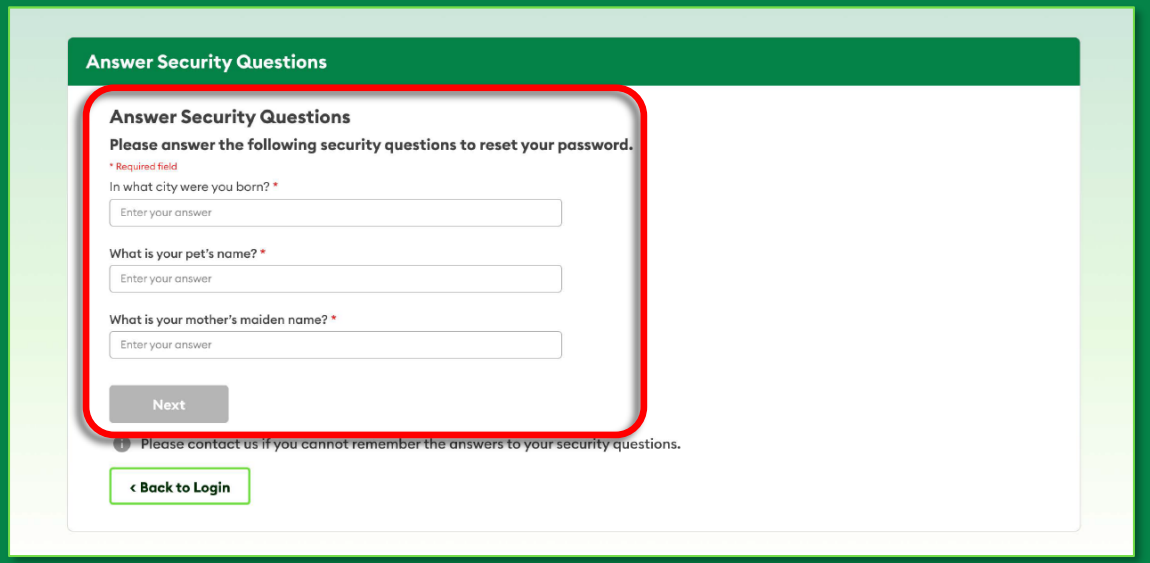

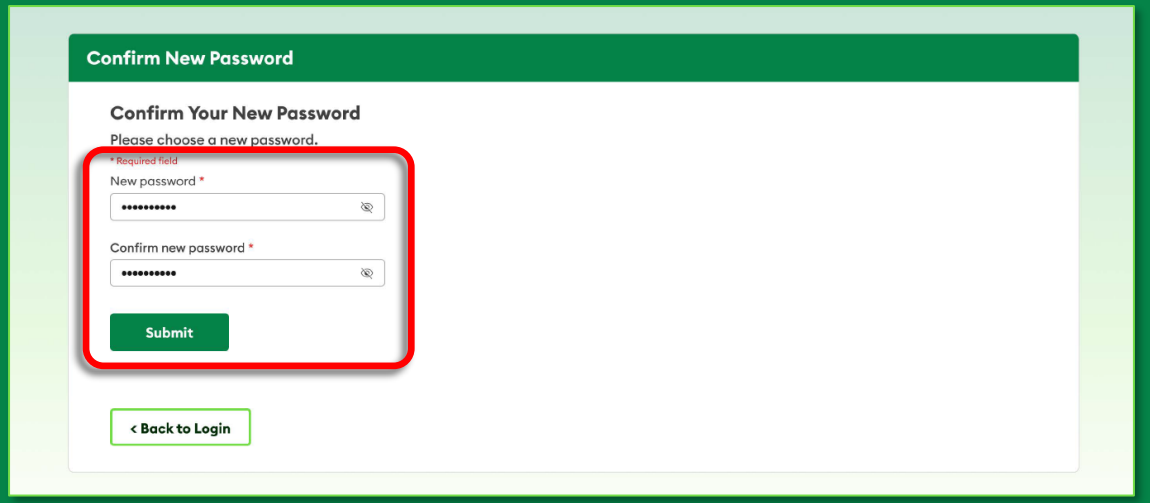

Forgotten Password Reset

The user will answer 3 of their security questions, as established after their first successful login, and select the ‘Next’ button.

Lastly, the user will enter their new password and select the ‘Submit’ button to officially reset their password.
